I have described my specific contribution to Week 1:

Choosing the Dataset, Hypothesis

I have described my specific contribution to Week 2:

1) Plots: Categorical Features (The "Why"), Feature Correlation
2) Cleaning decisions:

   Drop CustomerID (it's useless for patterns)

   (df.drop('customerID', axis=1, inplace=True))
3) Code sections: Final Correlation Check

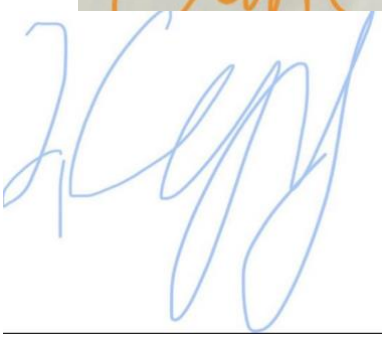

I have described my specific contribution to Week 3:

1) Models: Logistic Regression; SVM; Decision Tree
2) Sections in the notebook: Interpretations and logic
